4 FUNCTIONS TO SIMPLIFY THE INSTALLATION OF GLASS
BALUSTRADE

EASY POSITIONING
RELATIVE TO THE
HOLE IN THE GLASS
DUE TO BEANS IN THE
BASE OF FIXING.

HEXAGONAL HEAD SCREW ALLOWS FOR STRONG
TIGHTENING.
THE COVER IS INSTALLED AS THE LAST STEP.
AESTHETIC APPEARANCE THANKS TO HIDDEN
BOLTS.

SMOOTH ADJUSTMENT
OF DISTANCE FROM THE
FRONT OF THE
BALUSTRADE AFTER
GLASS APPLICATION.
WE APPLY THE GLASS
ONLY ONCE!

IN THE CASE OF FIXING TO THE
GROUND WITH A HEX HEAD SCREW.
DURING GLASS INSTALLATION,
M12 THREAD IN THE NECK ALLOWS
PUTTING A HEX KEY INSIDE TO LOOSEN
THE SCREW AND ADJUST THE
POSITION OF THE FIXING RELATIVE TO
THE HOLE IN THE GLASS.
